

# COMPANY INFORMATION & RECRUIT

2018/2019

**Virtual Reality Design Studio *UC-win/Road***

FORUM8 has provided the software and technology services which support the designing of civil engineering and construction including structure design since the company foundation, on the basis of the development technology of packaged software. With the development of virtual reality of recent years, FORUM8 products are widely utilized in a whole project, research of traffic and automobile, and information systems. Social request for the technology related to the safety and security is growing much further. FORUM8 is acting with the company mission to bring the safety and security to the society through the software development and service technology.

Foundation of our growth is the development of creative general-purpose software. So far, we have developed and improved the virtual reality software UC-win/Road and the dynamic non-linear analysis software UC-win/FRAME (3D) as the advanced software ahead of other companies. In 2009, we released Engineer's Studio® and VR-Cloud®, which are supporting our strategic deployment. FORUM8 has provided these products which lead to achievement of BIM/CIM. As for the cloud service, UC-1 for SaaS has been released in 2013, and "3DCADStudio®" and "3D bar arrangement CAD" have been provided for Android. 3DVR Cloud "VR-Cloud®" has been chosen as the cloud contract research from Ministry of Economy, Trade and Industry. We have acquired a lot of patents thanks to it. In addition, we have started High-performance computing on cloud® service with the aim of the utilization of HPC (High Performance Computer) as typified by "K". The laboratory was established in FOCUS (Foundation for Computational Science) next to "K", and our service has been selected as the business for industry use of "K".

On the other hand, as for the activities to improve the in-house system and to strengthen the organization, many international standards have been introduced such as Quality Management System (QMS), Information Security Management System (ISMS), Business continuity management system (BCMS), and PrivacyMark certification.

In 2016, we acquired Environmental Management System (EMS) and are aiming to improve environment by spreading cloud and improving quality. Self-developed core system supports the development and sales, and we were selected as "Top 100 Aggressive IT SME of Japan Award" by METI in 2015. We also have received "CRM Best Practice Award" and other company awards.

Product support and service have had a high evaluation, and a lot of people have attended our technical seminars. FORUM8 Publishing has been published some books and this year released the 120th issue of our public relations magazine Up&Coming. At the "11th FORUM8 Design Festival 3Days+Eve" in November 2017, four specialists from the government ministries delivered lectures at the second "Autonomous Driving Conference"

FORUM8 marked the 30 anniversary in May 2017, and we started to provide a TV program "VR Friends" and continue to provide a special edition of the program and "VR Friends 2". As a main event, we held a big 30th anniversary memorial special lecture and party. We compiled the history of our company into a booklet and released "VR Impact" published by "DIAMOND, Inc." to the market.

Under our principles of Up&Coming, Sociality, and Forum Spirit, we all employees continue to unite and act in order to meet the expectations of our customers.

 **FORUM 8<sup>®</sup>**

## FORUM8 TOPICS

Top 100 Aggressive IT SME of Japan Award

### Background of award (summarized)

FORUM8 Co., Ltd. sells its own developed software mainly supporting civil engineering and architectural design. FORUM8 has evolved while pursuing product development strategies to meet the new and changing market demand the company learned through its contact with its 17,000 customers despite the effects of economic condition and public business on the fields of civil engineering and architecture. Through its vigorous pursue over new product development FORUM8 has successfully expanded its business into the new field beyond that of civil engineering and architecture design in which it has long established its market share of its legacy software products designed to support engineers and architects, and the number of FORUM8's diversified product has now reached 175. Especially, by focusing on the software development for inventing and or enhancing our products with a strong emphasis on VR (virtual reality) and 3D, FORUM8 has achieved globalization and competitive advantage over its competitors, now performing much better than any of the top companies in the same business.

Level 2 Eruboshi

### FORUM8 was certified by the Minister for Health, Labour and Welfare as the "Level 2 Eruboshi" company based on the Act of Promotion of Women's Participation and Advancement in the Workplace

On 23 August, 2017, FORUM8 was certified as a "Level 2 Eruboshi" company according to Article 9 in the Act of Promotion of Women's Participation and Advancement in the Workplace. This certification is given to enterprises satisfying certain standards set by the Minister for Health, Labour and Welfare. The following five evaluation criteria are set by the ministry: (1) recruitment, (2) continuous employment, (3) work style such as working hours, (4) managers to staff ratio, (5) various career courses. We received "Level 2 Eruboshi" meeting the all criteria above except (2).

30th Anniversary Special Lecture & Celebration

FORUM8 has celebrated its 30th anniversary on May 23, 2017, and held a special lecture and celebration at the Imperial Hotel on June 13. At the celebration party, Mr. Yasuhiro Yamashita (Vice Chancellor of Tokai University, Vice President of All Japan Judo Federation, Development Director of International Judo Federation) delivered a lecture named "Challenge for Dream". FORUM8 also introduced its history and a TV program "VR friends" sponsored by the company, presented a new book "Virtual Reality Impact" (Written by President Yuji Ito / Sold by Diamond Inc.), and held a drawing for Thanks Gifts for users at the celebration party.

## FORUM8's CSR (Corporate Social Responsibility)

Through advanced software development, FORUM8 has been contributing to the society by taking part in business activities backed up by its robust technologies to promote a safe and secure society such as construction of social infrastructures based on smart structural design, provision of reliable technologies for maintenance of social infrastructures, and production of simulations solutions for public works projects using virtual reality since the foundation of the company. FORUM8 also hopes to contribute to the sustainable development of the earth and society by working on international projects as well as those in Japan.

Public Benefit International

### State of the Art Technologies in Expression Association

FORUM8 totally cooperates with this association that was established in order to support survey research of the most advanced expression technology and contents development using that technologies.

### International VR Symposium

With the purpose of utilization and development of the most advanced 3D VR technology by world researchers on architecture and civil engineering, international researchers (members of World16) are invited for this symposium.

▲International VR Symposium The 8th Summer Workshop in Boston

Social Welfare & Donation

### Donation to charity groups and NPOs

"FPB Point Donation" started in January 2011 with the aim of contribution to the society, and FORUM8 also donates to the following organizations: Japanese Red Cross Society, National Federation of UNESCO Associations in Japan, Doctors Without Borders, Workshop for Sustainable Community, Civil Machizukuri Station, NPO-Solidarity of International JUDO Education

### Donation to universities and educational organizations

FORUM8 contributes to college education and research by giving engineering books published by FORUM8 Publishing to university laboratories, academic societies, research institutes, and media in addition to donating to universities such as the University of Tokyo and Gunma University that are in the cooperative relationship on developments of WCOMD and ground FEM analysis software.

▲Mr. Yasuhiro Yamashita, Gold medalist, Director of NPO-Solidarity of International JUDO Education (FORUM8's 30th Anniversary Special Lecture)

▲"Learning Bridge Engineering through VR" Author: Mr. Tatsuo Inagaki, President of Paroway Tec Published in November 2017

CRM Best Practice Award for Consecutive Years

Forum8 Co. Ltd. has been awarded the "2017 CRM Best Practice Award" by the CRM Association Japan on 1 November, 2017. This award is distributed to only those who incorporate the most appropriate CRM-oriented practices to set model examples in Japan to reach the goal of "customer-centric relationship management". The "Enhanced model of dialogue between developers and industry stakeholders" was highly valued this year. Forum8 got "CRM Honourable Mention" in 2014 regarding its CRM principle in UC-1 development support. In the following year, 2015, Forum8 was awarded the CRM Best Practice Award, being highly valued for its more advanced and continual activities of "a fusion model bridging between advanced technologies and customer needs". Last year (2016), Forum8 was awarded the CRM Best Practice Award again. The efforts such as the enhancement of product demonstration, the improvement of instruction guidance, and the guide and operation of newly introduced subscription service was highly valued for the "Service system transition model such as subscription". This year, the development department has enhanced dialogue with users by the attendance of developers at user conferences and introduction seminars of civil engineering CAD.

Background of award (summarized)

Forum8 provides advanced simulation systems such as autonomous driving on the basis of civil engineering CAD technologies. Developers of the company actively attend products seminars and user communities to find potential user needs by directly talking with users. They also deal with complaints and inquiries so that the demands can be precisely reflected to products. In addition, Forum8 positively takes in advanced technologies by cooperating with Japanese and overseas universities and laboratories, and introduces its activities at international forums. Through these activities, the company plays a catalytic role in expansion and usage promotion of high technologies between industry stakeholders. Forum8 provides advanced simulation systems such as autonomous driving on the basis of civil engineering CAD technologies. Developers of the company actively attend products seminars and user communities to find potential user needs by directly talking with users. They also deal with complaints and inquiries so that the demands can be precisely reflected to products. In addition, Forum8 positively takes in advanced technologies by cooperating with Japanese and overseas universities and laboratories, and introduces its activities at international forums. Through these activities, the company plays a catalytic role in expansion and usage promotion of high technologies between industry stakeholders.

Community Activities

VR town-building experience seminar

In terms of the meaning and method of VR utilization in participatory urban development, FORUM8 holds seminars focusing on the simple self environmental assessment that recently attracts attentions.

Junior Software Seminar

FORUM8 provides elementary and junior high school students a chance to experience virtual reality and creation of city and railroad models for school research project and learning task.

▲Junior Software Seminar

▲Award Ceremony of the Junior Software Seminar 2017

Educational Activities

Events hosted by FORUM8

FORUM8 hosts "VDWC Students BIM & VR Design Contest on Cloud" and "CPWC Students Cloud Programming World Cup" that are international competitions for students as a sole sponsor. As the support for students who applied to the competition, FORUM8 provides product licenses and seminars during the contest for free.

Support for student competition

Like VDWC and CPWC (sponsored by only FORUM8), FORUM8 products are lent for participants of various competitions as the support.

# PRODUCTS

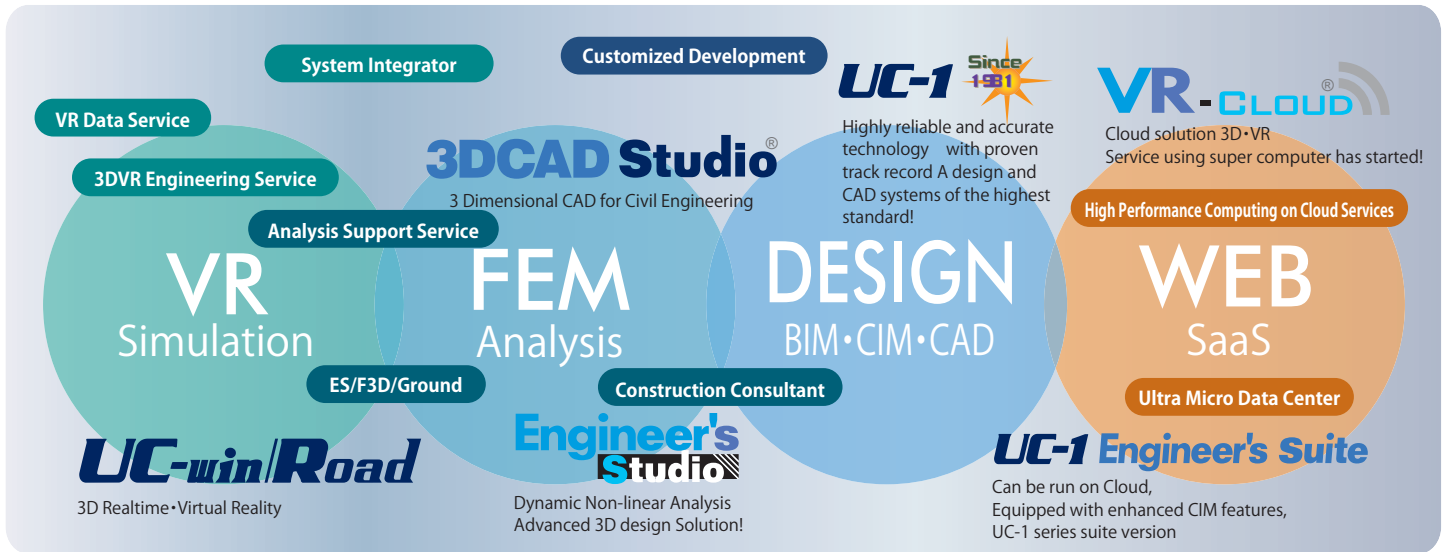

From four aspects, FORUM8 proposes the integrative system where the advanced technologies and the highest level solutions are gathered.

## FORUM8 Solution

"Up and Coming --- innovative and with great prospects" - the origin of the name of UC series

## "Development Room for Designers"

Aiming to increase creativity and richness in engineers' work.

## the ERA of VIRTUAL REALITY **UC-win/Road**

In 2020, VR market is expected to reach 8 trillion yen, ten times of that of now, and 2016 is said to be "the first year of VR". It was 2000 when FORUM8 released 3D virtual reality software UC-win/Road and entered the VR market. In September 2002, UC-win/Road was chosen as the Software Product of the Year. It has been improved and is currently used for wide variety of projects including traffic and vehicle research, robot development etc. as well as architecture and civil engineering. UC-win/Road will continue to evolve toward the realization of "The ERA of Virtual Reality".

## Providing Cloud

We are continuously developing the cloud version of our existing lineup of UC-1 series products one by one; they are named the "UC-1 for SaaS" series. VR-Cloud® is an ideal cloud computing solution for obtaining stakeholder consensus that takes advantage of the original developed a3S data transmission. It is funded by the Ministry of economy since 2010 as the cloud computing research and development project concerning the nation, and FORUM8 has acquired a lot of related patent. We have established a laboratory of our own in the FOCUS (Foundation for Computational Science) constructed near the next generation super computer "K". We offer all types of analysis and simulation including structural, noise, wind, thermal, fluid analysis, and CG rendering. We are currently designing and manufacturing a compact high-speed graphic server referred to as "UMDC" that is optimal for building cloud system.

FORUM8 obtained a patent for VR-Cloud® as the only cloud server program that allows driving simulation on cloud.

Announcing our rendering engine build.  
<http://www.forum8.co.jp/product/supercom.htm#kei>

▲Animated fluid rendering result via K-supercomputer (bath)

## BIM/CIM and i-Construction

FORUM8 is also focusing on IM&VR solution that supports the front loading of BIM/CIM greatly. In that solution, VR links up with civil engineering software, structure design and analysis software, and cloud system. We have also started to support CIM and i-Construction which are the major policy of the Ministry of land, Infrastructure and Transport and Tourism. CIM was more strengthened by the release of Engineer's Suite Addition in 2014. 3DCADStudio® which allows to smoothly link design, construction and maintenance in 1 3D data is planned to be started as a cloud CAD system in the future.

## Robotics Activity

FORUM8 built the system of 3D information display technology for construction robots in 2006. "Development of office robot" applying UC-win/Road and 3D point cloud modeling technology is approved for research and development project of Ministry of Economy on December 10, 2010. In addition, farming management and structure investigation by automatic flight robot are under development. In July 2014, the robot was chosen by The Japan Ministry of Land, Infrastructure, Transport and Tourism to be used as the Next-Generation Infrastructure Inspection Robot Systems.

FORUM 8's "VR - Robotics Linkage UAV Solutions for Structural Analysis" has been chosen by The Japan Ministry of Land, Infrastructure, Transport and Tourism to be used as the Next-Generation Infrastructure Inspection Robot Systems. (July 10, 2014)

## Analysis/VR Simulation

FORUM8 helps your model creation, analysis, and simulation. This technical service provide you smooth data creation, processing and visualization of analysis results, and 3-dimensional FEM analysis.

### ●VR Model/Engineering

Data creation service via 3D virtual reality. This allows you to help engineers and presenters to run simulations about road, urban planning, various kinds of public projects and private development etc. as a strong consensus building system.

### ●Structural Analysis

Engineering Service helps and supports users' design and analysis business. Structural analysis with advanced analysis tools is supported.

### ●Geotechnical Analysis

3D FEM analysis support service which allows you to smoothly proceed from data creation to processing and visualizing the analysis results.

GeoFEAS Flow3D

### ●Heat Conduction Analysis

Supports model input and analysis of FEMLEEG and JCMAC3, 3D temperature stress analysis.

FEMLEEG

### ●Building Energy Analysis

Supports environment and energy conservation simulation and building design for complexed architecture and civil engineering institutions as well as small-scale buildings.

DesignBuilder

### ●Flood Analysis

Supports the creation of the initial and VR models required for the analysis of the Complete Stormwater, Sewer and Floodplain Model xpswmm

xpswmm

### ●Traffic Analysis

Analysis support service and VR model creation service using traffic analysis tool including traffic simulation models.

Traffic Simulation

### ●Fire Evacuation Analysis

Supports EXODUS evacuation analysis, 3D CFD-FEM fire analysis of SMARTFIRE for architecture environments.

EXODUS

### ●Tsunami Analysis

Tsunami Analysis visualization via UC-win/Road is excellent for drawing hazard maps and may be used to derive possible countermeasures or evacuation methods.

UC-win/Road xpswmm Plug-in

### ●Design Result Analysis and Checkup Support Service

We provide design checkup support services for new projects, existing designs, and also 3rd party systems, through NEDO certified software.

Design Result Checkup Support Service

## 3D VR Engineering Service

Point-cloud VR Modeling / 3D Modeling, 3D bar arrangement CAD  
 Print VR models in 3D - UC-win/Road supporting 3DS output

### ●3D Scan/VR Modeling

Point cloud measuring by 3D laser scan and VR modeling service. It is also possible to be exported to LandXML.

UC-win/Road Point Cloud data

### ●3D Drawing Service

BIM/IFC Support 3D Modeling and 2D Drawing Service through Allplan. Also supports 3D reinforcing bar CAD, and bar conflict checks.

3D bar arrangement CAD Allplan

### ●3D Printing

Actual figures can be created based on 3-dimensional models by 3D printer. It can also be utilized to a projection mapping.

Ohashi junction model Shinagawa Intercity model

## HPC Analysis

Wind and heat fluid analysis CG rendering and movie service LuxRender rendering

Tsunami analysis

### ●Tsunami Analysis

### ●Wind and heat fluid Analysis

### ●Noise Analysis

### ●CG Rendering &

### Movie Services

## System Development Service

Tailored-made software customization to meet user demands. Software and hardware system integration services.

- UC-1 Civil Engineering Customization
- Assorted 3D, VR, FEM Customization
- Integrated Built-to-Order System Development
- Web, Cloud System Development
- Android App Development

VR-Cloud®

UC-win/Road Drive Simulator

## Technical Consulting Service

Technical Consulting Services by fusing expertly opinions with FORUM 8 software to provide the most appropriate consulting.

- VR Community Making System
- BCP & BCMS Design Assistance Service
- ISMS Design Assistance Service
- 3D Contents Service
- Publishing Service
- VR game development service

BCP Management System

3D Projection Mapping

# SUPPORT

The integrative systems and services that the highest level of solutions are gathered

## High-quality information / HP and a public relations magazine "Up&Coming"

Product information, technical support information, etc., are posted on FORUM8 home page. Users can download the latest products, and software can be updated automatically. FORUM8's in-house organ Up&Coming, which has run up to 120 in January 2018, provides a variety of topics and information to more than 10,000 users.

Top page  
[http://www.forum8.co.jp/english/User Introductions, Support Topics and other information](http://www.forum8.co.jp/english/User%20Introductions,Support%20Topics%20and%20other%20information)

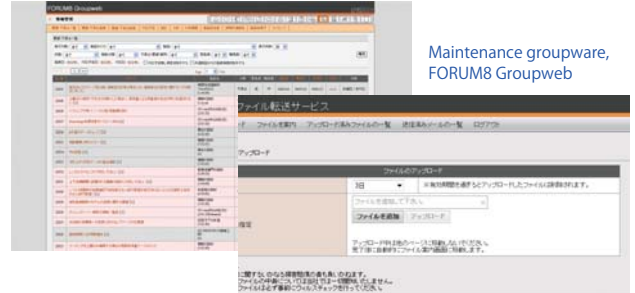

Up&Coming Vol. 120  
Support Topics and other information

HTML Newsletters are delivered with the latest information such as new product release and campaign

## Highly evaluated software support

FORUM8 has the expert team for test that is the most important of the quality and for inquiry. Maintenance information of the products is managed via the maintenance groupware, and issues and user demands are kept in the database. As to the development of software, we maintain our efficient and high-quality developing environment by BTS (Bug Tracking System) and VSS (Visual SourceSafe).

Maintenance groupware, FORUM8 Groupweb

## Maintenance groupware, FORUM8 Groupweb

Products for China and English-speaking countries are increasing including UC-win/Road, which is available in six languages: Japanese, English, French, Chinese, Korean, and Italian. We are also expanding dealers in the world. In 2014, we established the Qingdao office and Taiwan office. We will continue to enhance support for users abroad.

We actively participate in exhibitions and conferences abroad. FORUM8 booth at ITS Montreal.

# COLLABORATION

A variety of collaboration with organizations, companies, and businesses around the world

Business cooperation with Arcbazar started in March 2016. Arcbazar/Project VR

## Arcbazar

Arcbazar was founded by Imdat As, who studied in MIT and Harvard University Graduate School. Competition projects on the web span across several categories such as renovation, gardening, interior, and commercial or public building designs. Currently, there have been a total of more than 5,000 projects and 15,000 designers registered. FORUM8 has been entered into a business alliance agreement with Arcbazar.

<https://www.arcbazar.com/>

## Project VR

Arcbazar Support Service by FORUM8 to enhance Arcbazar's usability and effectiveness. "Online Simple Self-Assessment Support website" and various VR simulations of the environment, traffic, and crowd are available. Provides overall designs of projects in one stop: from the beginning of the competition to the provision of the VR service. Supports Arcbazar to expand Asian presence in particular.

Established "FORUM8 Okinawa" in July 2017. Held a opening seminar.

TV program "VR Friends 2" started in October 2017.

FORUM8 Design Festival 2016 Eve in November 2016

CEO Yuji Ito became the director of the Computer Software Association of Japan (CSAJ) in June 2016.

Became a member of Massachusetts Institute of Technology Industrial Liason Program. Towards advanced VR research and system development in January 2016.

Integrated all business of First System in December 2016.

Acquired the right to develop the Japanese version of Organic Parking in March 2015

Large amplitude vibration system was delivered to Shimizu Corporation in March 2015

Nagoya University introduced the world's first driving simulator in June 2015.

Took a stake in Yenbo Internet Service in October 2016

Signed the share transfer agreement and took over all of business of CRAVA Inc. in April 2015.

Received Top 100 Aggressive IT SME of Japan Award. (P.3)

Received the 2015 CRM Best Practice Award (P.3)

Received the 2016 CRM Best Practice Award

Integrated all business of Hocst Systems in February 2014.

Signing ceremony with CYBERNET in July 2014.

Signing ceremony to mark the beginning of marketing "OHPASS", an Optimal Highway Path Automatic Search System - March 2013

Opened a website to support self simple assessment commissioned by Workshop for Sustainable Community in April 2015

Received the "Risk Management Design Award" from Koukyo Network Association in March 2013

Co-developed a human-vehicle-traffic interactive simulation system with Graduate School of Kyushu Univ. in March 2012

Signing ceremony with PTV, Germany in October, 2011

Signing ceremony with VSAT, US in December, 2010

Co-developed a human-vehicle-traffic interactive simulation system with Graduate School of Kyushu Univ. in March 2012

## VR Simulation

Assorted Visualization Solutions through UC-win/Road, as well as Introduction to Cloud Cases

A variety of contents according to customers' business purposes and skill are provided. For example, we propose the introduction and utilization of UC-win/Road that realizes advanced simulations by using road CAD, terrain, and point crowd or cooperating with analysis of noise, tsunami, traffic, and evacuation, and drive simulation by linking and integrating VR and hardware. We always aim to support VR engineers and developers in civil engineering and automobile fields and contribute to the further spread and development of VR.

# C

Communicate

## FEM Analysis/BIM/CIM

Advanced Analysis of Civil Engineering / Architecture Designs BIM/CIM Integrated Solution

We provide powerful tools that support performance design of in the civil engineering industry such as 3 dimensional non-linear dynamic analysis, analysis of layers plate model, FEM analysis on ground, and flood analysis.

Recent years, we enhanced our seminar lineup with a view to BIM/CIM including the IFC supporting 3D CAD software Allplan, building energy analysis software Design Builder. We also correspond to the trend of the industry as quickly as possible.

## CAD Design/SaaS

Architectural Design CAD Software UC-1 Series

Forum8 UC-1 series products have been used for long years as the integrated product of calculation and CAD. We have upgraded the software, started to support 3D bar arrangement / 3D CAD, and enhanced functions in consideration of CIM.

We build curricula, hoping that they could be a support of more advanced business deployment by improving productivity in CIM process like design and construction management and using its latest functions considering i-Construction.

## FORUM8 Web Seminar

Since May 2015, Forum8 started "Web Seminar" available in anywhere via Internet. Participants who select the "Web Seminar Live" can see a seminar, and those who choose the "Web Seminar Interactive" are allowed to ask questions to lecturers and receive the answer on the spot during the seminar. We attempt to arrange the seminar environment available at home, in office, and in business trip destination as well as at seminar site so that more users can participate in our seminars.

## State of the Art Expression Technology Seminar

This is an introduction seminar of cutting-edge technologies using 3D VR supported by the State of the Art Expression Technology Association. Basic knowledge and linkage with UC-win/Road are explained based on three themes of 3D projection mapping, 3D printing, and AR/S3D and wearable device.

Connection created here.  
All for a safe and secure future.

## Event & Fair

Forum8 actively participates in exhibitions and events so that our users can experience our latest products and technologies faster than anybody. We can also have contacts with partner companies and potential users. We feel reactions and opinions from visitors of our booth at a variety of fairs we participate in Japan and overseas every year. We also obtain ideas from the newest trend of each industry and field. These knowledge are reflected on our developments and researches.

## Share

## Experience

### CIM & i-Con Seminar

This seminar is held on the day of the CIM that we provide our latest information of CIM solutions and support proposals. We brush up this seminar contents with i-Construction year by year.

### Junior Software Seminar

This is a seminar for elementary and junior-high students to create "my own 3D virtual space" based on such as railway diorama. Children can be familiar with the software and learn it while having fun, and this seminar enjoys popularity among the participants, their parents, and teachers.

### UAV plug-in & VR Experience Seminar

This popular seminar treats a linkage between UAV (drone) that is paid attention these days and UC-win/Road. Participants can experience the operation of an actual UAV at outside drone field and learn ways utilization of obtained data.

### UC-win/Road DS Experience Seminar

The appeal of this seminar is that participants can feel the full-fledged system combining UC-win/Road and a real-car type drive simulator and actually experience driving in our showroom. We explain practical contents such as vehicle behavior model and each setting.

## National Resilience Design Award

Hoping to contribute to the construction of society that has resistance to disasters, we established this competition in 2014 for the purpose of awarding activities contributing to the national resilience. In the field of ground, water work, and disaster prevention, the "National Resilience Design Award" has been held as the place to provide information and to improve skills by assembling concrete cases and results which is helping to strengthen the national land.

## 3DVR Simulation Contest on Cloud

This competition is held every year since 2002 when UC-win/Road won the "Software Product of the year" award. Against a backdrop of growth and spread of related technologies and high level of maturity of VR utilization, entries have become diversified and evolved year by year.

In addition to being able to feel passion and originality of users thinking to create their ideal data, Forum8 can propose new function utilization in this competition. From the 10th contest in 2011, we started a trial of "on Cloud", which nominated works are open and voting and final judging are conducted on cloud.

# Invent

## Student Cloud Programming World Cup

Cloud Programming World Cup

This is an international student competition of application program works on cloud or software developed with UC-win/Road SDK and a3s transmission system library of VR-Cloud®. How participants utilized SDK is evaluated in the points of programming quality, logicity, skill, beauty, originality, and presentation skill. We receive sophisticated systems than the previous year from students every year.

## Student BIM & VR Design Contest on Cloud

Virtual Design World Cup  
STUDENT BIM & VR DESIGN CONTEST

This is an international competition of designing advanced architecture, bridge, city, and landscape by using BIM/CIM and VR. Participants create plans, designs, simulations against a theme, and juries evaluate overall VR design and BIM/CIM activity. Previous themes were foreign countries such as Taiwan, Australia, and Myanmar as well as the planned site for Tokyo Olympics in 2020 and the fictional site.

Connection created here. All for a safe and secure future.

## Thinking of the Great East Japan Earthquake

Through the long history of the Design Festival, a lot of specialists in Japan and overseas in various fields delivered lectures and presentations, and we have shared themes including disaster prevention such as traffic safety, debris avalanche, tsunami, earthquake, and fire. We continue to produce products and services for secure and safe society by connecting Forum8's capacity of technological development and the most advanced researches.

## International Symposium VR Conference

"VR Conference" consisted of "UC-win/Road Conference" began in November 2000 and "International VR Symposium" started in 2007 was held as a yearly event in 2010. Forum8 receives various opinions to be reflected to continuous improvement and evolution of software from our users. We also presents the latest functions of our products. In the conference, we conduct an automobile-related session in addition to a civil-engineering-and-architectural-related session. In 2016, we held the "Autonomous Drive Conference" for the first time, and to the 2nd conference in 2017, officials from four ministries were invited and gave presentations.

Mr. Tadayoshi Ishibashi

## Junior Software Seminar

At Design Festival, we hold an award ceremony of VR works created by participants in junior software seminar and junior software school and students who purchased Road education version. Gold prize and silver prize are given to the works. Awarded works make us feel that UC-win/Road is the enjoyable design tool for elementary and junior high school students.

# SUMMARY

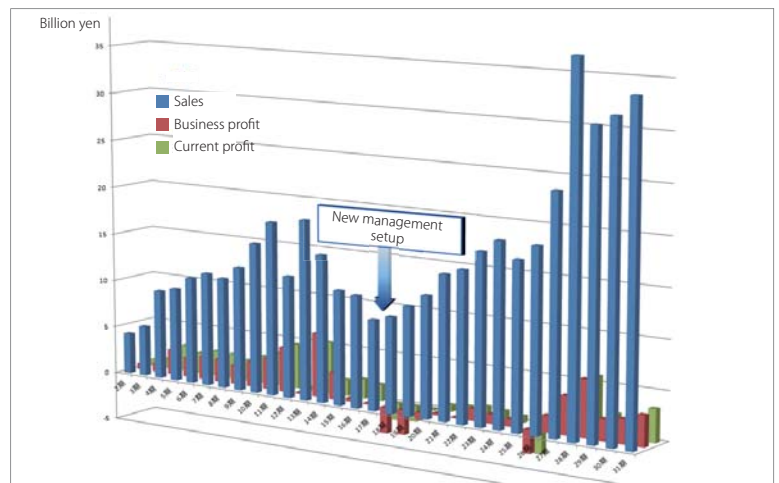

FORUM8 is developing almost all the main software and advanced research development software by itself, and that is promoting the free and flexible software development. In addition to the technologies of software development, the integration with new hardware is also the company's strength, and these technologies are highly evaluated recently. Besides, features of FORUM8 include realization of the efficient and smooth promotion of business by using IT technologies, and marketing practice including overseas seminars via the TV conference system and Web seminars which IT is utilized.

<b>Established</b>	May 1987	
<b>C a p i t a l</b>	50,000,000 yen	
<b>Business Activities</b>	Developing and marketing of civil engineering design support software  1. Personal computer software package development and marketing 2. Personal computer hardware accessories development and marketing 3. Computation solutions and services 4. Built-to-order software and services development 5. Design and analysis services 6. Integrated leasing and rental services 7. Industrial grade machineries, and robotics development, design, production, and marketing 8. Power supply and power retailing 9. Posses, lend, and manage estate 10. Business related to data center and cloud service 11. All other services or solutions related to the above	
<b>Annual Sales</b>	Sales: 3,384,550,000 yen. Current profit: 333,770,000 yen. (As of the 31st period, September 2016. Year-on-year earnings growth)	
<b>Number of Employees</b>	247 (October 1, 2017)	
<b>Main Bank Creditors</b>	The Bank of Tokyo-Mitsubishi UFJ, Ltd. Australia and New Zealand Banking Group Ltd. The Japan Finance Corporation The Shoko Chukin Bank, Ltd. Mizuho Bank, Ltd. Resona Bank, Limited. Sumitomo Mitsui Banking Corporation	

head office: Shinagawa Intercity A-21F

Transition of business results since the 2nd term and result of the 31st term

Since the current management team started in the 18th term, sales recorded positive growth for 7 consecutive periods and the best in the 28th with the increase of 53%. We reported a loss in the post-quake period, but sales increased over the next 3 terms. The 29th period recorded a great profit fall with the rebound of the previous term's 1.5 times growth, but as for the 30th and 31st period, we had higher earnings on higher sales two years in a row.

Driving simulation device, server device, and related programs	2011-137288	2013-4009 (13/01/07)	5149425 (12/12/07)
3D space information processing system, 3D space information processing device, 3D space information processing server, 3D space information processing device program, 3D space information processing server program, 3D space information processing method	2011-133352	2013-003778 (13/01/07)	pending
Information sharing system, server devices of related system Software and sharing methods of related server system	2012-163499	2014-021955 (14/02/03)	Pending
Simulation software programs that allow driving simulation through mobile devices.	2013-145512	2015-18110 (15/01/29)	5711312 (15/03/13)
Algorithm to predict user input intentions on a mobile devices and reflecting this onto driving simulation.	2013-173345	2015-039589 (15/03/02)	5718992 (15/03/27)
Simulation system	2016-019112	2017-138793 (17/01/20)	6077686 (17/01/20)

## Introduction of international standards

We continue to improve each quality, continuous business management, and private information protection management through activities related to "Quality Management System ISO9001", "Business Continuity Management System ISO22301", and "Privacy Mark" that we have acquired so far. In 2013, we newly obtained ISMS (Information Security Management System) Certificate.

### Quality Management System ISO 9001 Certificate

- Updated date: Sep. 27, 2016
- Certificate No.: QA-QMA14896
- Registered activities: for all departments

### Information Security Management System ISO27001 Certificate

- Updated date: Sep. 27, 2016
- Certificate No.: JQA-IM1208
- Registered activities: for all departments

### Business Continuity Management System ISO 22301 Certificate

- Updated date: Sep. 27, 2016
- Certificate No.: JQA-BC0005
- Registered activities: for all departments

### Private Information Protection Management System JISQ15001 Certificate

- Updated date: Sep. 27, 2016
- Certificate No.: JQA-EM7269
- Registered activities: for all departments

### Environmental management system ISO14001 certificate

- Updated date: Sep. 27, 2016
- Certificate No.: JQA-EM7269
- Registered activities: for all departments

### "Grade 2 Eruboshi" based on the Act of Promotion of Women's Participation and Advancement in the Workplace

- Certified date: Aug. 23, 2017

### Selected as "Certified company for IT management" in 2014

- Certified date: Feb. 6, 2014

## Company History

- 1987 Forum8 was established (with 16 employees)
- 1989 Established the Miyazaki branch and Osaka business office
- 1990 Established the Fukuoka business office / The number of registered users exceeded 2,000 companies
- 1993 The number of registered users exceeded 4,000 companies
- 1995 Commemorative project for the 8th anniversary of the establishment of the firm (with 100 employees)
- 1996 Osaka business office was promoted to the branch office / The number of registered users exceeded 6,000 companies / Established a subsidiary "FORUM8(NEWZEALAND)LIMITED" in New Zealand / Opened the FORUM8 website
- 1998 The number of registered users exceeded 7,000 companies.
- 1999 "FORUM8 Exhibition'99" is held / Products Guide of first edition was published
- 2000 Released UC-win/Road
- 2001 Acquired ISO9001-2000 realizing paper-less conditions in all offices
- 2002 Relocated Tokyo Head Office to Nakameguro GT Tower  
UC-win/Road was chosen for the Software Product of the Year 2002 award  
Hosted the first 3D VR Simulation Contest / Released UC-win/FRAME(3D)
- 2003 Business commemorating the company's 2x8 year anniversary / New President Yujito and new management setup / Number of registered users surpassed 10,000 companies
- 2005 Established the Nagoya business office
- 2006 The 7th UC-win/Road Conference first time abroad (Seoul, Korea / Beijing, China / Shanghai, China)
- 2007 Expanded Tokyo head office / Established a joint venture "FORUM8 Technology Development (Shanghai) Co., Ltd." in China / Hosted the first FORUM8 Design Conference and 1st International VR Symposium
- 2008 Launched the Sydney office
- 2009 Design Festival 2009-3days was held.  
Released Engineer's Studio® and VR-Studio®  
FRAME(3D) support team won the Fiber category of Pre-experiment analysis contest
- 2010 "Development of an office robot" was certified as the plan of specific research and development, etc. of the METI  
The METI Cloud research business adoption 2010  
Started service for UC-1 for SaaS/RC cross-section calculation  
Engineer's Studio® analysis's result became winner at E-Defence, and destruction analysis contest
- 2011 Opened Tokyo sub office, Super computer cloud Kobe Laboratory and Sendai offices / Selected as "Certified company for IT management" by the METI / Design Result Checkup Support System released (Adopted for NEDO promotion service in 2009) / Calculation method by EXODUS/SMARTFIRE Analysis Support Service was certified as an evacuation calculation method certified by the Tokyo Fire Department / Engineer's Studio® won the award, "23rd superior new technology, new products award for small and mid-sized enterprises in software category" / Highway Driving Simulator was awarded for being an information processing system that contributes to today's information-rich society to be recognized for the year 2011 / The 1st Student BIM&VR Design Contest on Cloud was held  
Won "International tunnel award" with Virtual Reality Tunnel Operator System which was co-developed by BMIA
- 2012 Further development of VR-Cloud® to allow it to be run on an Android Client / Obtained the "Privacy Mark" Certification. (Privacy Policy adopted since 2005) / Obtained Registered Surveyor License from Kanto-Region Maintenance Office, Ministry of Transportation / Obtained BCMS ISO22301 Certification
- 2013 Relocated Tokyo Head Office to Shinagawa Intercity. Launched Sapporo and Kanazawa offices  
Released UC-1 Engineer's Suite  
"The 1st Students Cloud Programming World Cup" started  
Engineer's Studio® received "Crisis Management Design Award" by the Public Network Foundation  
Obtained 3 patents related to VR-Cloud® (Driving simulation, data streaming system, cloud management system)
- 2014 Open Qingdao FORUM8 Software Technology Co., Ltd.  
Acquisition of Hoct Systems. / Obtained access rights to Supercomputer K for commercial uses.  
Patent approved for virtual space information processing systems  
Chosen as the Next-Generation Infrastructure Inspection Robot Systems by MLIT  
The 1st "Junior Software Seminar" for elementary and junior high school students was held  
Launched Taiwan FORUM8 Software Technology Co., Ltd. (FORUM8 TAIPEI)  
Released UC-1 Engineer's Suite Addition
- 2015 Nagoya Showroom opened  
Released 3DCAD Studio®. Obtained development right of Organic Parking in Japan  
Opening of Online Simple Self-Assessment  
Press release in Taiwan for the 5th VDWC, with Special Guest Mayor of Keelung and Taiwan CSA Director  
Acquired patent for simulation software programs allowing drive simulation through mobile devices  
Acquired all of CRAVA Inc. stocks, a 3D contents production studio.  
Formed business alliance with Hokuto Bank, FIDEA Information Systems, and Nihon Technos  
UC-win/Road was reported by Game Show and Nikkei
- 2016 Became a member of Massachusetts Institute of Technology Industrial Liaison Program.  
BBC reported the World's First 4K Five-Screen 3D Stereoscopic Driving Simulator (in NIC of Nagoya Univ.)  
Started to provide "Green coverage calculation service" in the self-assessment support website.  
Achieved the goal of "Improvement project of correspondence to infection"  
Notice of Transition to FORUM8 Subscription Service. New software licensing policy started on April 1  
Business partnership with Arcbazar. "Project VR", the fusion of Online Simple Self-Assessment Service and VR-Cloud®
- 2017 Showcased Road and DS at "CeBIT2017" (Hannover, Germany), the world biggest IT trade show.  
The 30th anniversary of establishment special lecture and celebration. Published company history.  
Showcased at Japan Pavilion of "INNOPROM2017", the largest trade show in Russia.  
Established a new company "FORUM8 Okinawa Co., Ltd." / Being certified as a "Grade 2 Eruboshi" company based on the Act of Promotion of Women's Participation and Advancement in the Workplace  
Released products corresponding to the new Specifications for Highway Bridges  
The 11th FORUM8 Design Festival 2017-3Days

## ●Tokyo Head Office&Showroom

2-15-1 Konan, Minato-ku, Tokyo  
**Shinagawa Intercity A-21F**  
 TEL.+81-3-6894-1888 FAX.+81-3-6894-3888

Moved to Shinagawa Intercity A-21F in July 2013.  
 Expanded the office including the server room and seminar room.  
 The office is close to Shinagawa station, and a showroom is also established.

# FORUM8 RECRUIT

New Graduate Recruitment

## Recruitment background

FORUM8 exerts its force primarily on the development/marketing of software that support civil engineering design, analysis, architectural design, etc. and lately the company has expanded its business into the development of Interactive 3D Virtual Reality (VR) Simulation & Modeling software as well as engineering services including analysis service and system development, offering various types of system integration including the development of Driving Simulators. We have our development and technical support group in Tokyo, Miyazaki, and Osaka. We envision the strategic production of software solutions and seek to bring our software service to higher levels. In terms of sales, we have been selling our products both domestically and internationally, with international users from Korea, China, United States, to name a few. We are planning for an extensive and stronger overseas dealer network with China placed in high priority. Foreign engineers skilled in English, Chinese Korean and other bilinguals have a great opportunity to work with us.
