

Majimon

majimon F8NFTS

We offer NFT System for various purposes!

Provides a secure platform to generate and authenticate various NFT documents in any file format, and issue NFT contracts, receipts and certificates using blockchain technology. It can be used to develop and provide NFT service for various purposes and can also be linked to the Metaverse. Offered and sold as a desktop version application as well.

FUNCTIONS

Metadata Generator

To issue an NFT, you first need to prepare a metadata file. The metadata contains information about the NFT.

Contract Generator

Once the metadata is prepared, the next step is to prepare the contract. There are 4 types of contracts available, depending on the use case.

NFT Generator

Once the metadata and contracts are ready, let's issue the NFT. Using this tool, you can easily issue NFT.

Contract Manager

You can manage the F8NFTS smart contracts you own.

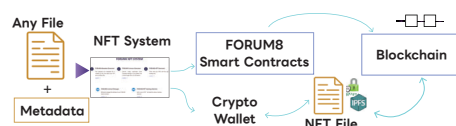

FEATURES

- Secure and authentic
- Supports any file in any format: Images, videos, voice, 3D models, documents, etc.
- Business file authentication
- Manage NFTs, price, distribution, and contracts
- With Metadata/Contract(-Cus-tomizable)/NFT Generator
- NFT Receipts and Certificates
- NFT directly into any wallet.

FORUM8 Web3 System

- Generates Metadata of files
- Deploys Smart Contracts that match your requirements
- Generates a secure NFT that authenticates

Application Examples

SIGHT-KEEPER

Combines digital stamp rally with GPS-tagged NFTs to provide high-quality photos and models. It can be used for co-branding or to issue souvenirs, etc. and deployed for a variety of purposes.

Virtual Resident Certificate

Efforts are being made to increase the number of people who are involved in the community (related population) as a way to solve problems such as population outflow. NFT is attracting attention as one of these efforts.

Majimon F8NFTS Ticketing System

Verification of whether a user has an NFT ticket is done on the blockchain. By issuing NFT tickets as SBTs (SoulBound Tokens), it is possible to sell tickets that are non-transferable.

Majimon F8NFTS Point Bank System

In-house point service, local currency, etc.

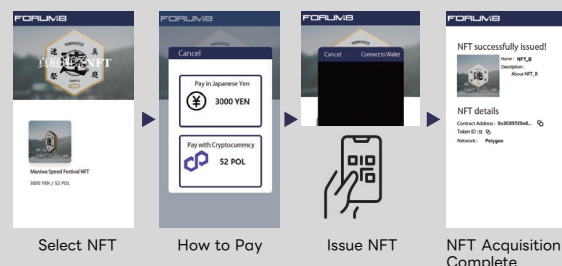

NFTCertificates

Providing technology on various documents such as design documents, etc.

NFT Vending Machine Application Examples

An example of issuing NFTs using a smartphone-based NFT Vending Machine at an event. Visitors can register images in advance and, using the wallet function, scan the displayed QR code at the venue terminal to issue NFTs.

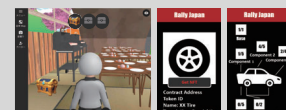

Majimon F8NFTS×Metavania F8VPS Application Examples

FORUM8 Rally Japan 2024 Rally Car Collection

Create your own one-of-a-kind original rally car

A game corner where you can create an original rally car by combining various body parts and custom parts. By going around the booth designed by F8VPS and the real spectator areas and service parks during the event, you can obtain 'Parts NFTs' and combine these to complete your own unique rally car. Additionally, the completed rally car can be collected and displayed within the metaverse, and can also be showcased in open NFT markets through MetaMask (a software wallet for storing tokens).

Get Parts NFT by hunting for treasures or taking a quiz.

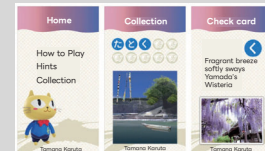

Customize a rally car using collected Parts NFT

Tamana City Metaverse

Promoting the charm of Tamana City via contents introducing events like the Iris Festival and Fireworks Festival

The scenes include recreations of tourist attractions and fireworks festivals in Tamana City. In the 'Tamana Karuta,' enhanced with the Majimon F8NFTS feature, users can take mascot character quizzes, discover Tamana's specialties in the metaverse space, and visit local tourist spots to collect 'Tamana Karuta NFTs.' This allows users to enjoy and familiarize themselves with Tamana's charm in a game-like experience.

'Tamana Karuta NFTs' can be collected by exploring the Metaverse space or visiting local tourists spots
